Skills

HTML, CSS, JavaScript, and some PHP. I work well as an individual or as a part of a team. Problem solver.

Driven, focused on providing excellent work and continual growth.

Experience

Web Developer | Sep 2017-Present

(HTML, CSS, JavaScript)

I have worked closely with clients and designers to make sure needs are met, and goals are accomplished on time.

Experience with page additions, creating new custom themes and migrating content, as well as writing plugins and complex functions to make sure the UI/UX are optimized to be seamless and efficient.

Working with a team is important to me, as I believe with multiple perspectives being a part of one idea, there can be continuous growth not only for the individual but for the project and group as a whole.

LazCreative (2017-2018)

Started by making small HTML/CSS adjustments and learning the fundamentals of the developer role.

Work completed on multiple websites. Created new content areas, which included building plugins on Wordpress to handle loading the appropriate content.

Also, gained experience coding html emails through infusionsoft, as well as working within Google Ads to help our clients reach their target audience. Languages I primarily worked with include HTML, CSS, and JavaScript (jQuery, Node.js).

Total Name Service (2019)

Mostly back end PHP work mixed with JavaScript. I wrote functions to send/receive user data based on the session or orders placed by the client. These would eventually be used to display the correct data on the UI.

Work was done within WHMCS, which utilizes templates written with Smarty syntax. Many changes were necessary in order to make the templates work to our needs, which required constant problem solving and testing on my end. One of the biggest challenges in this role was to automate a Client Profile setup,

which was to occur when their first order was paid for. To do so required a mix of JavaScript and PHP.

Education

University of Central Florida Full Stack Coding Bootcamp

August-November 2020

- HTML5, CSS3
- JavaScript
- jQuery
- Node.js
- Responsive Design
- Heroku
- Git
- User Authentication
- PHP frameworks like Laravel
- React.js
- MySQL
- MongoDB

Polk State College /

August 2014 -Present, Lakeland/Winter Haven, FL

At PSC, I have mostly focused on classes that would be directly useful in my life rather than a degree at this point. I am an exceptional student in Math and English.

I have also completed many online courses related to Web Development, as needed, to further my growth as a developer.

Lakeland High School /

Class of 2012, Lakeland, FL

I graduated from LHS, but for the entirety of my senior year I was enrolled in courses at PSC. Upon graduation I had various AP course credits, as well as college credits from Polk State.

During high school, I also played soccer and was a part of various public service programs such as VISTE and Parker Street Ministries.
